

## **Stage 2 Triggers -- MODERATE Water Shortage Conditions**

### **Requirements for initiation**

**Initiation will begin when total daily water demands reach 90% of District's capacity for five (5) consecutive days.**

### **Response and Goal**

Customers shall be required to comply with the restrictions of Stage 0 - Normal Conditions plus the following additional restrictions will be implemented.

1. No new filling or refilling of pools. Topping off of existing pools will be allowed. All pools must be covered when not in use.
2. No car washing will be allowed except at commercial centers.
3. Customers will be asked to:
  - A. Utilize water reuse where possible.
  - B. Check for and fix leaks.
  - C. Install aerators on faucets.
  - D. Use less water for bath or reduce shower time.
  - E. Wash only full loads of dishes and use water efficient settings if available.
4. The use of water for construction purposes from designated fire hydrants with bulk meter contracts will be limited or discontinued once the customer is notified 24 hours in advance.
  - A. Out of District Construction Meters will be limited or discontinued first.
  - B. In District Construction Meters will be limited or discontinued thereafter.

The goal will be a 10% reduction in usage.
